Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

Schedule 1 to the Environmental Permitting Regulations has been updated by the Environmental Permitting (England and Wales) (Amendment) Regulations 2013 to reflect the implementation of the Industrial Emissions Directive into England and Wales.

As a result of this, a number of previously permitted waste activities have now been amended to schedule 1 listed activities. These activities are referred to as 'newly prescribed activities'.

This variation is to add to the permit the following newly prescribed activities and subsequently vary the regulated facility from a waste facility to an installation:

- Section 5.6 A(1)(a), Temporary storage of hazardous waste with a total capacity exceeding 50 tonnes pending incineration for disposal.

Natural Resources Wales has also taken this opportunity to produce a consolidated permit in the modern 'EPR' format.

The existing waste facilities remain in the permit as separately listed waste activities and are not altered by this variation:

- Degassing treatment including:
 - distillation
 - separation
 - compressing
 - depressurising
 - drying

of hazardous waste for recovery

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number
